

# How do you bring it all together?

Leverage your investment in Enterprise Performance Management (EPM) technologies and processes by making sure you are delivering the right information to the right people at the right time. Using a unique, patent-pending, Business/IT alignment methodology, in our alliance with The Business Foundation Corporation, we can help you align your EPM initiatives with your strategic imperatives and set the foundation for delivering on the promise of EPM.

## Let The Goal Getters Help You:

- Define the real drivers of value in your business
- Align strategic requirements to operational execution
- Put the entire business on one sheet of paper to visualize how information is interconnected and to help break-down silos
- Create a common business language with standard definitions, rules & calculation
- Maximize your investment in people, process, technology and data
- Document your holistic EPM vision
- Deliver your management systems roadmap in-line with business priorities
- Enroll your entire executive team in your enterprise performance management vision
- Build a business case for each EPM initiative

## Understand the true drivers of value in your organization

Of course you know what metrics tell you how well you are managing the business, but do you know what drives them, how they are interrelated, and who actually needs to see them? Our visual methodology clearly shows the “line of sight” from the tactical, operational KPIs, all the way up through strategic value drivers – letting you quickly see what metrics matter most.

## Align your IT portfolio with the needs of the business

Why invest in rolling out a new technology solution that (a) may not directly contribute to your strategic objectives, or (b) may only be enabling a poorly performing process? Our method aligns your portfolio with what’s important.

## A validated, prioritized EPM Roadmap in under 6 weeks

Based on our proprietary database of over 1,500 metrics, measures, and KPIs, organized by industry and function, our methodology aligns strategic objectives with your IT portfolio and shows you the most material ways to leverage EPM.

It’s fast, fixed, and action oriented. You are not left with a binder to gather dust on a shelf; you are left with a set of interactive roadmaps and initiatives that you can quickly operationalize.
